

STEM Advancement, Inc is a 501c3 dedicated towards the advancement of STEM and Education. Our mission is to create and provide a common curriculum to enhance training in the physical and life sciences for rural and inner-city students across Mississippi and neighboring states. All our training centers around hands-on engineering, science, and robotics courses for the purpose of career preparation. STEM education creates critical thinkers, increases science literacy, and enables the next generation of innovators. We want to empower students to be people of character, who contribute to the enrichment of society. The state of Mississippi has always ranked lowest in education with a high school drop-out rate around 30%. We encourage students to learn, study, and not only graduate, but help them prepare for any career they choose by teaching them job related skills. We integrate “real-world” experiences into the curriculum to deepen students cognitive thinking skills. STEM Advancement Inc has created different programs that are geared towards the mission of promoting STEM for K-12.
